

For best results, your child should be:

- Standing up against the wall on a hard surface.
- Distributing full weight equally on both feet.

Be sure to measure both feet!

steps to finding the length of your child's foot

- 1 Place child's heel on the smiley face heel line.
- 2 Read the first line past the longest toe.
- 3 If the two numbers are different, select the larger number in the length drop down menu.

steps to finding the width of your child's foot

- 1 Fold and cut out the width ruler where indicated.
- 2 Align the width ruler tool at the ball of the child's foot.
- 3 Wrap the ruler around the foot until it joins the starting point.
- 4 If the two numbers are different, select the larger number in the width drop-down menu.
- 5 At this point your measurement is complete. Please click on the continue button.
